

Impact Brief — 1000 Gretas

Digital campaigns + donor storytelling that increased engagement and improved conversion

by: Trevor Tuck

The goal

Increase donor engagement through campaign-based storytelling and strengthen conversion by refining the supporter journey.

What I did

- Built campaign briefs and a production calendar to align stakeholders and ship consistently
- Wrote donor-facing email + social copy that centered dignity, agency, and outcomes
- Refined the supporter journey (sequencing, CTAs, landing clarity) using performance learnings
- Reported performance weekly to drive iteration and accountability

Results

- **+158%** donor engagement across **12** campaigns
- **20%+** conversion lift via journey refinements
- Repeatable campaign system created (calendar + templates + reporting)

Ethical storytelling approach

Narratives avoided savior framing, emphasized community agency and consent, and grounded claims in outcomes and lived experience.

Tools

Email platform • CRM • Analytics • Canva • Docs/Notion

CTA

Redacted campaign samples and a performance snapshot available on request.
